| ✓ Redux | ✓ CSS3 | ✓ Vercel | ✓ NPM |
| ✓ MongoDB | ✓ Typescript | ✓ NextJS | ✓ TailwindCSS |
| ✓ SQL | ✓ Javascript | ✓ MaterialUI | ✓ Och mer... |

Experience

Ecom AI - SaaS (Apr 2023 - Ongoing)

Tech Stack: React, Typescript, Styled-Components, OpenAI API

Client: Isberg Media AB

Description:

Together with my team of three developers, we are building an e-commerce platform that uses OpenAI's API to help e-commerce businesses automatically generate product descriptions and save the end customer (e-commerce businesses primarily focused on dropshipping) tons of hours when launching new products online. The service is delivered to the end customer as a SaaS solution.

EcomLaunch.se - Stripe Integration with Clickfunnels (Mar - Apr 2023)

Tech Stack: Node.js, Express.js, Javascript and Stripe API

Client: Isberg Greenhouse AB

Description:

Built a Stripe integration with Ecomlaunch.se's Clickfunnels site. The integration helped the client process millions of kronor in online sales.

Happypatches.se - Stripe Integration with Centra (Mar - Apr 2023)

Tech Stack: Node.js, Express.js, Javascript and Stripe API

Client: Isberg Media AB

Description:

Built a Stripe integration with Happypatches.se's Centra site. The integration helps the client sell mosquito repellent in the form of fun stickers that are placed on the arm.

Byggegendator.se - Web Scraper for Online Products (Feb - Mar 2023)

Tech Stack: Node.js, Express.js, Javascript, Puppeteer.js

Client: Jonathan Westman

Description:

I was part of a team of three developers who built a web scraper. Our mission was to gather information from hundreds of product pages on iNET.se, which updates prices and product information for all computer components sold on Byggegendator.se.

We helped the client go from idea all the way to a finished product and saved tons of working hours. The client no longer has to manually update prices and product information for each computer component on Byggegendator.se. Instead, this is done automatically with our new web scraper.
